<https://www.linkedin.com/in/yatharth-donarkar-662549350>

Career Objective

Motivated and passionate Computer Engineering student with strong skills in full-stack web development, backend systems, and Linux. Eager to apply technical knowledge in real-world projects and contribute to innovative software solutions while continuously learning new technologies.

Education

Bachelor of Technology (B.Tech) in Computer Engineering
Suryodaya College of Engineering and Technology, Nagpur
Expected Graduation: 2028

Technical Skills

Languages: Core Java, Python, JavaScript, HTML, CSS
Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js)
Backend Development: REST APIs, Authentication (JWT), Express.js
Operating Systems: Linux (Shell commands, basic administration)
Tools & Platforms: Git, GitHub, VS Code

Experience

Student Training and Placement Coordinator

Suryodaya College of Engineering and Technology, Nagpur

- Coordinating placement activities and acting as a bridge between students and recruiters
- Assisting in organizing campus drives, training sessions, and workshops
- Supporting students in resume building, interview preparation, and career guidance

Projects

AI-Based Resume Screening Tool

Developed an AI-powered tool to automatically analyze and shortlist resumes based on job requirements. Implemented NLP for skill extraction and scoring.

Tech Stack: Python, Flask, NLP, Scikit-learn

CampusVote System

Built a secure online voting platform for campus elections with user authentication and result visualization. Integrated an admin panel for candidate and election management.

Tech Stack: Node.js, Express.js, MongoDB, React.js.

Fake News Detection System

Developed a Machine Learning-based Fake News Detection System that analyzes news articles and predicts whether the content is real or fake. The system uses Natural Language Processing (NLP) techniques for text preprocessing and classification algorithms to improve detection accuracy. It helps users verify news credibility and reduce misinformation.

NeuroGestureX – AI-Powered Tele-Rehabilitation System

NeuroGestureX is an AI-powered tele-rehabilitation platform designed to assist patients recovering from neurological disorders, strokes, injuries, or mobility impairments. The system uses Artificial Intelligence, Machine Learning, and Computer Vision to monitor rehabilitation exercises remotely, analyze patient movements in real time, and provide instant feedback to improve recovery outcomes.

Achievements

Winner – CODEHUNT 24-Hour Hackathon, Suryodaya College of Engineering and Technology, 2024

Completed a 45-day Data Structures & Algorithms practice challenge in C++.

Completed a 45-day Python programming challenge with daily coding exercises.

Additional Information

Interested in AI, web application development, and scalable backend systems. Active participant in coding competitions and hackathons.
